Present a Summit On:

**Good Samaritan Protection to Enhance Abandoned Mine Land Cleanup -- Finding a Path Forward**

April 26, 2018 — CSM Campus, Golden, CO

---

**Reclaimed Flambeau Mine Wisconsin.**

The Flambeau Mine was the first mine to be approved and operated under the Wisconsin’s stringent mining standards. The Flambeau Reclamation Project completely backfilled the open pit with original rock material that was separated from the ore. The post-mining land use for the site was light recreation and wildlife habitat. Diverse habitats were created on the site by reestablishing forested areas, various native grasslands and wetlands.

---

This conference is intended to be a follow-up to the two previous conferences on AML Issues held by Colorado School of Mines in the Fall of 2016 & 2017.

The Overall Objective of this Summit is to “Identify necessary liability protection from applicable environmental laws that will advance closure and remediation for identified pilot/demonstration projects”.

The Summit’s Outcome is a “Diverse coalition of stakeholders working to advance pilot and demonstration projects focused on Good Samaritan legislation that enhance Abandon Mine Land cleanup”.

All parties interested in the effective closure of Abandoned Mine properties across the United States should attend this conference.

Steve Moyer, Trout Unlimited; email: smoyer@tu.org
Old Works Golf Course. Anaconda, Montana, had been the home of a copper-smelting facility operated by Anaconda Mining Co. since 1884. Atlantic Richfield Co. purchased Anaconda Mining in 1977 and subsequently closed the smelting plant. EPA determined the location to be a Superfund site. Working with members of the local community, ARCO settled on a plan that eventually resulted in Old Works Golf Course, which opened in 1997.

Renditions Golf Course, Maryland. Chaney Enterprises was honored for compliance to State and National regulations and processes, contemporaneous reclamation execution, drainage control, bond release for reclamation success and innovation on the Mardis Mine facility. The reclamation resulted in construction of the Renditions Golf Course. Chaney Enterprises assisted in the land use transition.
